

Brigitta of the White Forest

Brigitta of the White Forest is a story about two fairy sisters and their adventures to save their home, the White Forest, from being taken over by an evil fairy named Hrathgar. Hrathgar was a fairy of the White Forest who was split into two parts "Good Hrathgar" and "Bad Hrathgar" when she tried to steal the Moonstone from Gola who is a tree being. Bad Hrathgar tried to steal the Hourglass of Protection from the fairies to obtain its power. She was caught and banished by the fairies to a faraway castle on Dead Mountain.

After a while bad Hrathgar used her magic to turn all the fairies to stone and Brigitta and her sister Himalette were the only ones who were not turned to stone because they had been turned blue after touching a Sprite.

Brigitta and Himalette heard that Hrathgar was a fairy with magic that could help them not realizing she was the one who was to blame. They then journeyed to where Hrathgar was and met new friends called Minq and Gola along the way. Minq joined them along with a set of Gola's eyes on their journey. Once they got to the castle they found out about the two Hrathgars. Good Hrathgar helped them break the spell by killing herself and at the same time bad Hrathgar.

I would give this book 10 fairies out of 10 because it's about girls having an adventure and being strong. Also because Brigitta and Himalette were blue and they respected the environment like the Navi people in Avatar. I especially liked Minq because he had long furry ears that were really useful. He sounds cuddly and cute.

At first I didn't get into the book because I found it a little slow and it didn't have much action. But once the sisters were turned blue and the fairies were turned to stone it got interesting. I really liked the ending because Brigitta became an elder after saving the fairies and the White Forest.
