

4 kids in 5 E and one crazy year

Utopia Central School is a normal school except for class 5 E. In 5 E Destiny, Giovanni, Maximo and Willie have problems. If Destiny doesn't stop passing notes she will have a letter sent home. Max is angry, because his dad left. Willie is very worried, for his grandmother is in the hospital. Giovanni doesn't know how to read, he also doesn't want to go to summer school.

Ms. Hill's their teacher is extraordinary from other teachers. She gives them their own writer's notebooks. The class learns many skills in creative writing. When Ms. Hill teaches the class how to write, everyone in the class makes progress. Ms. Hill is an angel, since she doesn't force the class how to write, she makes writing sound like a hobby.

Writing made the four kids solve their problems. The class wrote to Willie's grandmother to get well. Destiny concentrated on her writing, she stopped passing notes. Max tried to write to his dad and Gio, well he didn't really write to solve his problem, instead he concentrated on reading.

This book is superb, because the author divided the story into ten parts like the ten months in the school year. This book is different from fantasy books, because it is about everyday life. I like the kids in this book for it is a book about ordinary kids that are the same age as me. I would rate this book 9/10.
