

# Word Nerd

This is an excellent book for sure. The only thing that I can say is that I would only recommend it to grade 6+. I loved the fact that even if none of those things had ever happened to me in real life I could relate to all the characters as if they were a real person. I also liked that I could identify all the places, oh and one more thing... I loved being able to find the words in the anagrams! Especially the ones that she hadn't found!! I would give this book a 10/10.
