

Stone Goblins

David Melling

Review by Gose

I like this story.

It is about the Stone Goblins who live in the caves under the Lumpy Lake. I like the map at the beginning that shows the Lumpy Lake, the mountains and the Dragon. The compass is silly and does not have the right directions on it.

All the names of the goblins are silly and funny.

The best part of the story is when the goblins get eaten by the dragon, go to the dragons belly and get spit up again.

The drawings are nice too.
